Manage Galleries

Use the "spin down" indicator in the left column to expand the tree items to view sub-categories and galleries. Only Content Managers and Administrators can create, update, or delete categories for galleries.

To create and use Galleries with images from multiple members, please read the Help topic on this subject.

Galleries can be embedded into custom pages, events, the Membership Information page, and the Home page. Paste the embed gallery text displayed for your gallery into the location where you want the gallery to appear. Gallery positioning is based on options set for the Gallery.

Author's Image Id:

This is a field for the author's use only to help identify the image within the author's collection.

If a Sequence Name is present, your image will be placed into an Image Sequence. Clear the name or set the Image Number to zero to remove the image from an Image Sequence. Each image within an Image Sequence must be numbered sequentially.

The titles for images in a sequence will be altered automatically when viewed to include the sequence number, but NOT the name of the sequence. You can control where the sequence number is inserted into a title by coding "[]" or "[2 of 3]" into you title. The actual numbers will be inserted in that location instead of at the end of the title.
